. Hazards Identification

GHS CLASSIFICATION OF SUBSTANCE OR MIXTURE: Eye damage: Category 1, H318

GHS LABEL ELEMENTS:

HAZARD SYMBOLS

DANGER!

PRECAUTIONARY STATEMENTS:

H318 Cause serious eye damage/eye irritation

HAZARD STATEMENTS: SIGNAL WORDS:

PREVENTION P202 Do not handle until all safety precautions have been read and understood. P260 Do not breathe mists.

P264 Wash hands thoroughly after handling.
P270 Do not eat, drink or smoke when using this product.
P273 Avoid release to the environment.

P280 Wear protective gloves, clothing, and eye/face protection.

RESPONSE

P301+P330+P331+P312 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Call POISON CENTER and/or doctor if you feel unwell.
P303+P361+P634+P353+P352 IF ON SKIN (or hair): Take off immediately all contaminated clothing and wash before reuse. Rinse skin with water/shower. Wash with

plenty of soap and water.

P333+P313 If skin initiation or rash occurs: Get medical attention.

P304+P340 If skin initiation or rash occurs: Get medical attention.

P304+P340 IF INHALED. Remove person to fresh air and keep comfortable for breathing.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P308+P313 IF exposed or concerned: Get medical attention.

STORAGE P403+P233 Store in a well-ventilated place. Keep container tightly closed.

DISPOSAL P501 Dispose of contents and containers in accordance with local, regional and

international regulations.

Precautionary statements are listed according to the United Nations Globally Harmonized System of Classification and Labeling of Chemicals (GHS) – Annex III

Composition / Information on Ingredients Read entire MSDS for a more thorough evaluation of the hazards

General Information:

See toxicological information (section 11)

2-Hydroxypropyl aniline

3077-13-2

Amounts specified are typical and do not represent a specification. Remaining components are proprietary, non-hazardous, and/or present at amounts below reportable limits.

4. First Aid Measures	
Eye Contact:	Check for and remove any contact lenses, Immediately flush eyes for at least 15 minutes with running water. Hold
Skin Contact:	yelids apart to ensure rinsing of the entire eye surface and lids with water. Get immediate I case of contact, wash affected areas with plenty of water, and soap, if available, for seve
Inhalation:	nd clean contaminated clothing and shoes before re-use. Get medical attention if irritation love exposed person to fresh air. If not breathing, give artificial respiration or oxygen, If breathing.
	ansport to medical care and, if available, give supplemental oxygen. Loosen tight clothing alt, or waistband. Get immediate medical attention.
ingestion:	lash out mouth with water. If swallowed dilute by giving two (2) glasses water to drink. Do r rect to do so by medical personnel. Never give anything by mouth to an unconscious perso
Note to physician:	medical attention,

o. Fire-righting Measures	CS .
Flash point	232°C (449.6°F) Pensky-Martin closed cup
Decomposition Products:	Decomposition products may include the following materials: carbon dioxide, carbon monoxide, halogenated compounds metal oxides and other povides.
Extinguishing Media: Special Exposure Hazards:	Carbon dioxide, foam, dry chemical, water spray as suitable for the surrounding fire Promptly isolate the scene by removing all nersons from the vicious of the fire.
Special Protective equipment for fire-fighters:	be taken involving any personal risk or without suitable training. No Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
6. Accidental Release Measures	easures
Personal Precautions:	No actions shall be taken involving any personal risk or without sulfable training. Evecuate surrounding areas. Keep unnecessary and unprotected personnel from entering area. Do not touch or walk through spilled material. Avoid breathing vapor or mist and provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate
Environmental Precautions: Methods of Clean Up:	Avoid dispersal of spilled material and runoff that leads to contact with soil, waterways, drains, and sewers. Inform the relevant authorities if the product has caused environmental pollution. Stop leak if without risk. Move containers from spill area. Approach spill from un wind if
	possible. Prevent spill from entering sewers, rivers and other water courses, basements or confined areas. Wash into effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material (e.g. sand, earth, vermiculite, or diatomaceous earth) and place in container for disposal according to local regulations. Dispose of only using a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information.

should wash hands and face before eating, drinking, and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Persons with a history of skin sensitization problems should be employed in processes where this material is used. Keep in the original container or a suitable alternate made from a compatible material. Keep all containers tightly closed when not in use. Empty containers retain product residue and should be disposed of properly. Do not reuse empty containers for other purposes or to hold other materials.

Store in accordance with local regulations. Store in original containers, at 10°C - 35°C. Keep away from incompatible materials (see Section 10) and food and drink. Keep all containers tightly closed when not in use and tightly re-seal after use. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Storage

8. Exposure Controls / Personal Protection

If this product contains ingredients with exposure limits, personal, workplace, atmospheric, or biological monitoring may be required to determine the effectiveness of the ventilation system or other control measures and/or to determine whether it is necessary to use respiratory protective equipment. It will also be necessary to reviewed national guidance documents for determining how to handle and relevant Recommended Procedures: Monitoring

Hazardous Substances

No special ventitation requirements are necessary for this product. Good general ventitation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure lenits, use process enclosures, local exhaust ventilation, or other engineering controls to keep worker exposure below the recommended or stautory limits. Wash hands, forearms, and face thenoughly after handling any chemical products, before eating, smoking, and using the lavatory and at the end of the work period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety Engineering measures

showers are close to the workstation location. Personal Protection

Hygiene

In case of inadequate ventilation wear respiratory protection. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Chemical Resistant, impervious gloves that comply with an approved safety standard should be worn at all times when handling chemical products if a risk assessment indicates that this is necessary. Consider the parameters specified by the glove manufacture and check gloves during use to ensure they are retaining their protective properties. Hands:

Safety eyewear complying with an approved standard should be used when a risk assessment indicates chemical splash googles unless a higher degree of protection is required.

Personal Protective equipment for the body should be selected based on the task being performed and this is necessary to avoid exposure to liquid splashes, mists, or dusts. If contact is possible use

Eyes:

Skin.

the risks involved. Typical protective equipment includes non-absorbent lab coats, disposable protective sleeves, coats, or whole body suits. See a safety specialist to determine the appropriate level of protection for your task. Emissions from ventilation or work processes should be checked to ensure they comply with the requirements of environmental regulations. In some cases, furne scrubbers, filters, or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. Environmental

13. Disposal Consideration

Waste Disposal Method: Disposal of this products, solutions, and by-products should at all times comply with the requirements of environmental and waste disposal legislation and any regional or local authority requirements. Dispose of surplus, non-recyclable products via a licensed waste disposal orditation. Waste disposal contractor waste should not be disposed on untreated to the sewer system unless this is complaint with all applicable laws and regulations. Incineration by an approved and licensed contractor is the most common disposal method. Packaging materials that and absorbents containing the product can typically be landfilled or incinerated. Contact local authorities to determine the proper means of disposal in your area.

14. Transport Information

Not regulated for transportation purposes under 49CFR (US DOT), TDG (Canada), IATA, and IMDG regulations

15. REGULATORY INFORMATION

US Federal Regulations:
Occupational Safety and Health Act (OSHA): This product is considered to be a hazardous chemical under the OSHA Hazard Communication Standard (29 CFR 1910, 1200).

Resource Conservation and Recovery Act (RCRA): This product is considered to be a hazardous waste under RCRA (40

SARA Title III: Section 304 - CERCLA: This product does not contain chemicals regulated under Section 304 as extremely hazardous substance(s) for emergency release notification ("CERCLA" List):

SARA Title III: Section 311/312 - Hazard Communication Standard (HCS): immediate (acute) health hazard

Delayed (chronic) health hazard

SARA Title III: Section 313 Toxic Chemical List (TCL): This product does not contains) a toxic chemical for routine annual Toxic Chemical Release Reporting under section 313 (40 CFR 372).

TSCA Section 8(b) - Inventory Status: All chemical(s) comprising this product are listed on the TSCA inventory

TSCA Section 12(b) - Export Notification: This product does not contain chemicals which are subject to Section 12(b)

State Regulations:

California Proposition 65: This product contains less than 0.1% of a chemical known to the state of California to cause cancer. 4-vincyclohexene, ethylbenzene, and 1,3-butadiene. This product contains less than 1% of a chemicals currently on the California list of Known Carcinogens and Reproductive Toxins: 4-vincyclohexene, methanol, toluene,

International Regulations:

REACH Status (EC 1907/2006): This material has been registered, pre-registered, or is otherwise exempt from

REACH Annex XIV (SVHC): No listed components as of validation date

Reach Annex XVIII (Restrictions on the manufacture, placing on the market & use of certain dangerous substances, mixtures, and articles): No list components as of validation date

Class D-2B: Material causing other toxic effects

Class E: Corrosive Material

Australia Inventory (AICS): Canadian Inventory (CEPA-DSL): China Inventory (IECSC): nternational Lists
